

Personnel Experience

The company personnel represent a wide range of expertise in water management and environmental disciplines from geology and engineering to computer science, economy and civil and water engineering. The company's specialists have performed projects and provided technical assistance in many countries.

comprises a seasoned and experienced team of groundwater, geologic, geophysics, GIS, modeling, groundwater management and groundwater quality professionals with extensive experience in the exploration for, development, and management of groundwater resources in volcanic, sedimentary as well as basement rock settings. We are a lean project team with the firms' principals and key staff having extensive hands-on experience in all of the technical disciplines that are necessary for the elements of this project.

It has 10 regular and more than 10 short-contract national and international experts with a wide range of experience in:

- Isotope and hydro-geochemical modeling
- Groundwater exploration and assessment (well siting, drilling and pumping tests supervision)
- Exploration geophysics and engineering geology
- Geological, hydrogeological and hydrochemical mapping
- Groundwater and balance modelling
- Groundwater pollution and vulnerability studies and Environmental Impact assessment (EIA)
- GIS, remote sensing and database management
- Water management structures design, hydraulic, electrical and civil engineering calculations and project supervision

The company's specialists have performed projects and provided technical assistance in many countries.

Language Capabilities

The company staffs have the ability to communicate and prepare reports in Amharic, Afan Oromo, Wolaytigna, Sidamigna, Guragigna, Somaligna, Tigrigna, English, Spanish, German, Czech, Slovakian and Russian.
